

Europe Tackles Information Chaos

Prague, September 22-23, 2022

Invitation

A healthy democracy relies on citizen engagement and an active civil society, not only during elections but on a daily basis. Engaged, informed and empowered citizens are the best guarantee for the resilience of our democracies.

The Central European Digital Media Observatory (**CEDMO**) is an independent non-partisan multidisciplinary hub which aims to research and prioritise the most critical sources and causes of information disorders in Central Europe. On the occasion of the Czech Presidency of the European Union, CEDMO will hold an international conference on disinformation.

During this one-and-a-half-day conference, experts and key stakeholders – including NGOs, academics, think tanks, journalists, legislative and technology actors – will explore a comprehensive range of topics, among others:

- the impact and regulation of disinformation
- media, fact-checking and the war in Ukraine
- the relation between technology and disinformation
- efforts to strengthen media and information literacy
- the power of data for research purposes.

Registration and more details on cedmohub.eu/cedmo-international-conference/

The **CEDMO International Conference (#CIC2022)** places great emphasis on the principles of Sustainability and Circular Economy, in line with the strategy of the capital city of Prague, Czechia.
